

Fleming County Quality Assurance Team

Team Mission:

The Fleming County District Level Quality Assurance Review (DQAR) team will provide a progress report that is a critical component of the AdvancED accreditation/diagnostic review process. It will engage the school district in a detailed review and analysis of the steps it has taken to address the required actions made by the previous KDE Diagnostic Review team. Completing the report helps the school district focus and reflect on its continuous improvement efforts and what further steps need to be taken to ensure that all components of the Standards for Quality Schools are met. It is the responsibility of the school district to address each of the (DQAR) report's actions within the noted timeline prior to the KDE Diagnostic Review scheduled for March 15-17.

Quality Assurance Process/Procedures:
