

Fever: Students are excluded from school if they have a fever 100.5 or greater OR a temperature less than 100.5 with unusual lethargy, irritability, persistent crying, difficulty breathing or other signs of severe illness.

Diarrhea Illness: Students are excluded from school if they have an increased number of stools compared with their normal pattern (watery stool or decreased form) OR have stools not contained by diapers /toilet use.

Vomiting Illness: Students are excluded from school if they have two or more vomiting episodes in a 24 hour period of time. If healthcare provider statement indicates that a student can return to school, then the student may attend school.

Rash Illness: A student with a rash should be excluded from school until the rash is resolved unless he/she has a current statement from healthcare provider stating that the student may return to school. If student returns to school with a rash or draining sore, school must require a statement for the student's healthcare provider stating that the student may return to school.

Upper Respiratory Infection, Colds and Viral Outbreaks: There is not public health recommendations for exclusion at this time. However, student should be well enough to perform normal daily activities. In situations where extensive outbreaks affect cost effective operation of the school, closure is an administrative decision.
